Respected sir,

In short:

Foreign parties are taking advantage of our stupidity and not solving this issue and the people doing this conspiracy are buying time using this situation.

- Request to stop conspiracy over me, many countries are keeping an eye on what we are doing, anything stupid we do will cause problems for us in future.

- I'm not a tcs/infosys engineer, I'm a faang (google) level senior computer/software engineer who also does research and engineering in Artificial Intelligence since 2015, I don't share all this because I don't want special treatment I just want my rights and life back

I should earn easily around 50 to 80 lakhs / year In India and around 10 crores / year in SF US, for s/w engg and AI roles.

Don't believe me, see my comments in this post by deazy, the guy making the project is a google staff engineer In India, I'm providing constructive criticism to him.

<https://news.ycombinator.com/item?id=43379262>

Also do check my linkedin and twitter and ask people I have worked with, I'm not able to work right now due to this conspiracy. Also this is nothing I don't share anything online of my work and research, people will be shocked when they will find this out.

Yet I have been only patient with the system to help me.

- They have wasted 2.5 cr of my earnings and 250 cr of government/public/tax resources throughout years on this fraudulent/scam joke investigation/surveillance/operation.

- I'm a normal smart tech person, well educated, not-insane who just wants to do good and make money for everyone, I'm being unnecessarily tortured and my life is sabotaged by them.

- see this "betting racket linked to Mumbai police, revealing names and connections to Pakistan" Maha/Mumbai police/intelligence are busy doing all this (fraud/conspiracy) over me (an software/computer engineer, AI scientist/engineer) based on lies and stupid suspicion for 7 years now and they are yet to clear my name, but they overlook people in their own departments. What joke is this ?, whole world is watching this madness

<https://www.hindustantimes.com/cities/mumbai-news/betting-operations-are-thriving-with-police-help-alleges-danve-101742929964313.html>

You and various officials, in high places have been sent multiple mails by me over the years regrading the torture and sabotage of my life by unlawfull and fraudulent scam investigation/operation over me, which is a conspiracy, that is going on since 2009 and publicly since 2018, using national security, pakistan and prime minister's security as an excuse.

I'm going to over the next few months expose this entire thing to you and everyone what is happening here and with me throughout the years. I request you, pm sir, hm sir and Maharashtra and Indian government to take action before that and stop what is happening over me so as to not become or be seen as a part/accomplice in this conspiracy.

This entire thing is a joke and the whole world is aware of the circus that is happening here, the people doing this want to make you all the ringleader for this so as to get protected by you all and your powers, don't fall for this trap, I have nothing against politicians, industrialist, police, intelligence or BJP/Maharashtra government. I don't seek fame or money out of this, I'm fully capable of earning that on my own through my efforts and talents. I wanted this thing for years to be handled and solved internally but the people doing conspiracy over me have going a big racket which brings them great money and power and a comfortable long running investigation/operation which is in-consequential so they do/run other things using this.

I have been both psychologically and physically tortured. I have evidence for all of this.

My life and career have been sabotaged, I'm not allowed to move to another state or country, through various means, as that will stop their conspiracy.

I don't have mental illness yet they are colluding with people to discredit me and defame me, this will backfire as I have records and evidence that will prove the opposite.

There is zero evidence, zero reason/doubt about me being a bad person let alone a terrorist/rapist/peodphile or anti-national yet this racket has been going on for 7+ years and now foreign countries with superior tech like the US got involved so weird things are happening.

I have one simple question for the claims they are making regarding justifying this whole thing about national security and pakistan.

Why on earth will this only happen to me in the whole of India and world, why doesn't pakistan use the same methods or technology over other people in India or their other operations, I'm borned in Mumbai, India, My family is living here from last 3 generations, Hindu south Indian, no criminal background, you know we can do DNA test to identify if I'm India, South Indian or not, also I'm highly educated and smart individual we are not that rich but we don't have financial problems, also I can't be brainwashed its stupid I'm autistic, I get annoyed but don't hate on things, also why will pakistan use me or continue using me if I'm sending mails for last 7 years is beyond my understanding, see my social media or meet me in person, you will understand how crazy are the people claiming these things over me are. This only show's to the world that we are either stupid/in-competent or we are doing conspiracy with support of state and central government.

Stop destroying your country's future and talent in the name of such conspiracies and stupid/crazy people/officers, one day all people like me who actually build things and solve problems will leave Maharashtra and India, no one will bother to do anything. You all might think we are nothing and you don't need us, but that is just hubris.

Ditesh
