Respected Sir/Madam,

I'll keep it short and brief.

This was checked over me by the people doing conspiracy, (deep state) via the means and ways I have mentioned in my mails before.

I learned about it around 1.5 years ago and waited a year till now to share this because I required some evidence for the same.

On confirming it from my side now I will share it, I have no way of knowing if this is going to happen, I'm not trying to scare anyone or share mis-information, and like every other time, I'm sharing only to ensure to stop something bad from happening and to save lives.

I don't know what it means nor I have any proof, I'm not making allegations against anyone or have any other malicious intention, I'm sharing this with the intent of stopping something bad from happening in the best interest of my country (India) and its people and world, please forgive me if its found to be that, I'm just sharing what was checked over me in good faith and with best intention.

We have a demographic dividend with our youth population, which everyone knows and talks about but there is another one that is **very scary, It's the demographic disaster waiting to happen**, It's their parents, grandparents etc and the **health wise vulnerable population that are at high risk** due to their lifestyle and situation.

This crisis is like a doomsday clock for our country. Please take it seriously, I have lost sleep thinking about this and thinking that can even we avoid this.

It is estimated that **0.4 % of our population required medical/health attention, doctors, hospitals during covid-19** and everyone knows how overwhelming that was and how many **people lost their lives to it due to under capacity of various health infra, services etc.**

I have strong reasons (deep state) to believe that the demographic I have mentioned is going to start to require the same soon, how soon I don't know, but here is the scary part.

This from my rough calculation in the best case scenario is going to 4% of our population that is more than 10 times the number from covid-19.

And there are going to be other factors, such as climate/environmental crisis, social tensions, geo-political tension etc that are going to make it even worse than one can imagine.

And also based on my rough estimations **it's going to take at least 3 years to build capacity for 1% needs for the same**, so I feel if after you confirm this please act fast and avoid this if possible.

As for evidence I can share the following. I know it's not convincing but this is the best I can manage.

**There is huge privatization visible and invisible with health infra at various cities and states.**

<https://scroll.in/article/1081161/mumbais-move-to-privatise-five-government-hospitals-will-hit-slum-dwellers-hard>

**Rising number of cases of violence against doctors and health care workers, The R.G. Kar Medical College Case, and associated rise in brain drain with health talent (doctors, surgeons etc).**

**And Finally I have tracked investments, fund flows in hospitals/health infra based private players (stocks) In India.**

**This is still so stealthy, it was the best performing at their cap level in Fy25 last year, Nifty was +/-5% during this time.**

**The portfolio I made (+37.9%) with this info beat the top performing mutual funds this year, I'm sharing proof of the same, even within mfs health ones were the top performers, I only didn't manage to beat the china one fund.**

<https://economictimes.indiatimes.com/mf/analysis/121-equity-mutual-funds-gave-double-digit-returns-in-fy25-do-you-own-any/articleshow/119638740.cms>

I'm sharing screenshots below for the same.

This is one of my last emails revealing such info, I have exposed the deep state now, I think they will stop checking info on me now, and there is a high chance I might get killed soon.

See my posts finally proving who was doing conspiracy on me (deep state)

Save people's lives please, even if you don't save mine.

Ditesh
